EXPERIENCE:

Tim worked for a number of architectural firms in the Pittsburgh, PA area during the years of 1992-1998 gaining valuable experience in the areas of computer aided drafting and design, office management, computer trouble-shooting, as well as health care, retail, and commercial architecture. He owned and operated Crowley's Architectural Drafting Designs, a full-service CADD company, for three years, and was also a volunteer for Habitat for Humanity during this time, gaining valuable teamwork experience as well as additional residential construction experience.

Tim moved to the Ohio Valley in 1998 and worked as the lead designer and construction manager for the Ohio Valley branch of a Columbus, Ohio architectural firm. He then accepted the position of Construction Manager for a \$2.2 million dollar church addition where responsibilities included hiring sub-contractors, overseeing sub-contractor day-to-day operations and managing an on-site work force as well as church volunteer projects.

In August of 2000 Tim became an integral part of the Kayafas Architects team, in Wheeling, WV, and successfully completed a large number of commercial projects for the firm as project manager and handled the majority of the firm's construction administration tasks. He worked for Kayafas Architects for over 10 years.

Tim worked for 2 years as the Director of Design and Construction for Century Equities, a real estate investment and development firm, gaining valuable experience in real estate acquisitions and construction projects on the east coast. Responsibilities included new building & development designs, overseeing renovations, & performing building inspections.

Tim became Co-Founder / Principal of Breisch & Crowley, LLC in 2012.

A progressive Design / Build firm based in St. Clairsville, Ohio, Breisch & Crowley performs a variety of work including: residential additions and renovations, custom residential designs, site assessments for residential and commercial developments, as well as commercial projects including: adaptive reuse, religious, healthcare, restaurant, educational, office, banking, retail, museum, manufacturing, distribution, industrial, & civic projects.

In 2009, Tim acquired LEED AP certification, which designates the status of a Leadership in Energy and Environmental Design Accredited Professional. This certification affirms knowledge of green design & construction practices and their implementation. He served as the LEED Construction Coordinator for over \$30,634,722 of LEED construction projects, helping to successfully ensure that the projects' LEED / green goals are met.

In addition to his many years of construction experience Tim is also a West Virginia licensed General Contractor
